INTERNATIONAL PRELIMINARY EXAMINATION REPORT

International application No.
PCT/US03/40414**V. Reasoned statement under Rule 66.2(a)(ii) with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement****1. STATEMENT**

Novelty (N)	Claims <u>30-33</u>	YES
	Claims <u>1-29</u>	NO
Inventive Step (IS)	Claims <u>30-33</u>	YES
	Claims <u>1-29</u>	NO
Industrial Applicability (IA)	Claims <u>1-33</u>	YES
	Claims <u>NONE</u>	NO

2. CITATIONS AND EXPLANATIONS

Claims 1-29 lack novelty under PCT Article 33(2) as being anticipated by Carlsson (WO 01/10080 A2).

In claims 1-29, Carlsson discloses, in fig. 1, a method of wireless communication comprising monitoring a first network (monitoring packet switched network 20) in accordance with a first air interface (SGSN 22); and receiving a message (receiving a notification message) from a second network (circuit switched network 30) being associated with a second air interface (associated with gateway 34) different from the first air interface (gateway 34 is different from SGSN 22). See abstract.

Claims 30-33 meet the criteria set out in PCT Article 33(2)-(3) because the prior art does not teach or fairly suggest transmitting from the subscriber station to a second base station controller a request for an identifier to support communications with a packet switched network after the subscriber station moves into the second geographic region.
